

Roger Flores

Redwood City, CA • rflores3113@gmail.com • (650) 785-1299

rogerflores.dev • github.com/RogerFlores3113 • linkedin.com/in/rogflores

AI engineer who builds end-to-end (model to product layer) and ships.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, SQL

AI / ML: LiteLLM, OpenAI & Anthropic APIs, RAG, vector search, embeddings, Claude Code, Ollama, PyTorch, sklearn, Pandas

Backend: FastAPI, Node.js, SQLAlchemy, Alembic, Redis/arq

Databases: Postgres/pgvector, MySQL, Elasticsearch, Cassandra, Alembic

Frontend: React, Next.js, MUI

Cloud / DevOps: AWS (ECS Fargate, RDS, KMS, S3, ElastiCache, ALB), Terraform, Docker, GitHub Actions, Git

EXPERIENCE

C3.AI (via Paradyme Management)

Redwood City, CA

AI/ML Software Engineer

Jan 2025 – Aug 2025

- On a 6-engineer team, maintained a production inventory-optimization system for a billion-dollar client; owned bug fixes, front-end pages, and job-management work across C3's React/Python platform (Cassandra + SQL).
- Surge-staffed a multi-county property-appraisal rollout on a 40%-compressed timeline; ramped on a new codebase in under two weeks and shipped all assigned features on the revised deadline.
- Developed a software version upgrade for C3's largest customer, coordinating across engineering and client stakeholders to deliver the migration on time and without service disruption.

BigHat Biosciences

San Mateo, CA

Software Engineer Intern

May 2023 – Aug 2023

- Shipped end-to-end features on an internal lab inventory system (React, Python, Postgres, AWS), from ticket to deploy, working directly with scientists and product at startup pace.

Genentech

South San Francisco, CA

AI/ML Engineer Co-op

Jul 2022 – Dec 2022

- Trained and evaluated ML models across scientific domains on an HPC cluster via SLURM; built researcher-facing dashboards that surfaced actionable insights from experimental data.

Northeastern University

Boston, MA

Teaching Assistant - Machine Learning 2

Jan 2024 – Apr 2024

- Produced 20+ exam prep videos for the full cohort; class average rose 15% vs. the prior term.

PROJECTS

Podium | Personal AI Assistant Platform

podium.rogerflores.dev

Python, FastAPI, Postgres/pgvector, Next.js, AWS, Terraform

- Production-grade AI assistant with RAG, agentic tool use (Tavily web search, E2B Python sandbox), long-term memory, model-agnostic routing via LiteLLM, Clerk auth, and full AWS infrastructure via Terraform.

LLM Experiments | Local model research and writeups

experiments.rogerflores.dev

Python, Ollama, LoRA

- Running experiments on local LLMs via Ollama: LoRA fine-tuning, layer-level probing for internal reasoning detection, and quantization cliff analysis across model scales.

Search | Agent websearch & task automation using local LLMs

Python, Playwright, FastAPI, Ollama, LoRA

- Built a local AI browser agent that executes natural language tasks in real Chrome, distributed as a zero-dependency desktop app for nontechnical users on Mac and Windows.

EDUCATION

Northeastern University | Khoury Honors Program

Boston, MA

B.S. Computer Science, Minor in Mathematics

Sep 2020 – Aug 2024
